Abstract

This is a template for generating ALCOM-FT technical reports. It is optional to use this template, but the submitted reports should preferably be formatted for **A4** paper, **single-column**, and using a font size of **11pt**. It is crucial that all submitted reports contain a **reference to ALCOM-FT** as in the footnote below. On the first page of the submitted postscript file will be inserted the assigned ALCOM-FT technical report number and ALCOM-FT logo. It is therefore important that the topmost 25 mm of the front page are left blank.

1 Introduction

Here goes the body of the paper...
